The management of The University of Chicago (University) is responsible for the preparation, integrity, and fair presentation of the consolidated financial statements. The consolidated financial statements, presented on pages 4 to 46, have been prepared in conformity with U.S. generally accepted accounting principles and, as such, include amounts based on judgments and estimates by management.

The consolidated financial statements have been audited by the independent accounting firm KPMG LLP (KPMG), which was given unrestricted access to all financial records and related data, including minutes of all meetings of trustees. KPMG did not audit the financial statements of The University of Chicago Medical Center (the Medical Center) and their opinion, insofar as it relates to the amounts included for the Medical Center, is based solely on the report of PricewaterhouseCoopers, the independent auditors for the Medical Center. The University believes that all representations made to KPMG during its audit were valid and appropriate. KPMG’s audit opinion is presented on pages 2 and 3.

The University maintains a system of internal controls over financial reporting, which is designed to provide reasonable assurance to the University’s management and Board of Trustees regarding the preparation of reliable published financial statements. Such controls are maintained by the establishment and communication of accounting and financial policies and procedures, by the selection and training of qualified personnel, and by an internal audit program designed to identify internal control weakness in order to permit management to take appropriate corrective action on a timely basis. There are, however, inherent limitations in the effectiveness of any system of internal control, including the possibility of human error and the circumvention of controls. Accordingly, even an effective internal control system can provide only reasonable assurance with respect to financial statement preparation.

The Trustees of The University of Chicago, through its Audit Committee comprised of trustees not employed by the University, are responsible for engaging the independent accountants and meeting with management, internal auditors, and the independent accountants to ensure that each is carrying out their responsibilities. Both internal auditors and the independent accountants have full and free access to the Audit Committee.

Nimalan Chinniah  
Vice President for Administration  
and Chief Financial Officer

John R. Kroll  
Associate Vice President for  
Finance
Independent Auditors’ Report

The Board of Trustees
The University of Chicago:

We have audited the accompanying consolidated balance sheets of The University of Chicago (the University) as of June 30, 2012 and 2011, and the related consolidated statements of activities and cash flows for the years then ended. These consolidated financial statements are the responsibility of the University’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We did not audit the financial statements of The University of Chicago Medical Center (the Medical Center), which statements reflect total assets constituting 20% and 20% and total revenues constituting 44% and 42% of the related consolidated totals in 2012 and 2011, respectively. Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for the Medical Center, is based solely on the report of the other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the University’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits and the report of the other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audits and the report of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of The University of Chicago as of June 30, 2012 and 2011, and the changes in its net assets and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.
Our audits were conducted for the purpose of forming an opinion on the basic consolidated financial statements as a whole. The supplementary information included in schedules 1 through 3 is presented for the purposes of additional analysis and is not a required part of the basic consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audits of the basic consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic consolidated financial statements or to the basic consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the basic consolidated financial statements as a whole.

See accompanying notes to consolidated financial statements.
(1) Summary of Significant Accounting Policies

(a) Description of Business

The University of Chicago (the University) is a private, nondenominational, coeducational institution of higher learning and research. The University provides education and training services, primarily for students enrolled in undergraduate, graduate, and professional degree programs, and performs research, training, and other services under grants, contracts, and other agreements with sponsoring organizations, including both government agencies and private enterprises. Certain members of the University’s faculty also provide professional medical services to patients at The University of Chicago Medical Center (the Medical Center) and other healthcare facilities located in the area.

Significant accounting policies followed by the University and the Medical Center are set forth as follows. Accounting policies specific to the Medical Center are discussed in note 2.

(b) Basis of Presentation

The consolidated financial statements of the University have been prepared on the accrual basis and include the accounts of the University and the Medical Center. The organization of the Medical Center and agreements between the University and the Medical Center are discussed in note 2.

The University maintains its accounts in accordance with the principles of fund accounting. Under this method of accounting, resources for various purposes are classified into funds that are in accordance with activities or objectives specified by donors. Separate accounts are maintained for each fund.

For reporting purposes, however, the University follows the reporting requirements of the Financial Accounting Standards Board (FASB) and the American Institute of Certified Public Accountants (AICPA), Audit and Accounting Guide for Not-for-Profit Entities, which require that resources be classified for reporting purposes based on the existence or absence of donor-imposed restrictions. This is accomplished by classification of fund balances into three classes of net assets – unrestricted, temporarily restricted, and permanently restricted. Descriptions of the three net asset categories and the types of transactions affecting each category follow:

- Unrestricted – net assets that are not subject to donor-imposed restrictions. Items that affect this net asset category principally consist of fees for service and related expenses associated with the core activities of the University – instruction, conduct of sponsored research, and provision of healthcare services. In addition to these exchange transactions, changes in this category of net assets include investment returns on unrestricted “funds functioning as endowment” funds, actuarial adjustments to self-insurance liabilities, and certain types of philanthropic support. Such philanthropic support includes unrestricted gifts, including those designated by the Board to function as endowment and restricted gifts whose donor-imposed restrictions were met during the fiscal year, as well as restricted gifts and grants for buildings and equipment that have been amortized over the useful life of the assets acquired or constructed.
THE UNIVERSITY OF CHICAGO
Notes to Consolidated Financial Statements
June 30, 2012 and 2011
(In thousands of dollars)

- Temporarily Restricted – net assets subject to donor-imposed restrictions that will be met either by actions of the University or the passage of time. Items that affect this net asset category are gifts for which donor-imposed restrictions have not been met, gifts and grants for buildings and equipment, annuity and life income gifts, pledges for which the ultimate purpose of the proceeds is not permanently restricted, investment returns on “true” endowment funds, and endowments where the principal may be expended upon the passage of a stated period of time (term endowments). Expirations of restrictions on temporarily restricted net assets, including amortization of restricted gifts and grants for buildings and equipment, are reported as net assets released from restrictions.

- Permanently Restricted – net assets subject to donor-imposed restrictions to be maintained permanently by the University. Items that affect this net asset category include gifts and pledges wherein donors stipulate that the corpus be held in perpetuity (primarily gifts for endowment and providing loans to students) and only the income be made available for program operations, and annuity and life income gifts for which the ultimate purpose of the proceeds is permanently restricted.

Temporarily and permanently restricted net assets consisted of the following at June 30:

(c) **Operations**

Operating results in the consolidated statements of activities reflect all transactions increasing or decreasing unrestricted net assets except those items associated with long-term investment, actuarial
adjustments to self-insurance liabilities, changes in postretirement benefit obligations, changes in the fair value of the interest rate swap agreements, and other infrequent gains and losses.

(d) **Tuition and Fees**

Student tuition and fees are recorded as revenue during the year the related academic services are rendered. Student tuition and fees received in advance of services to be rendered are recorded as deferred revenue.

(e) **Gifts, Grants, and Contracts**

Gifts, including unconditional pledges, are recognized in the appropriate category of net assets in the period received. Contributions of assets other than cash are recorded at their estimated fair value at date of gift. Pledges receivable are stated at the estimated net present value, net of an allowance for uncollectible amounts. Conditional promises to give are not recognized until the conditions on which they depend are substantially met.

Revenue from government and private grant and contract agreements is recognized as it is earned through expenditure in accordance with the agreements. Any funding received in advance of expenditure is recorded as deferred revenue on the consolidated balance sheets. Included in deferred revenue at June 30, 2012 and 2011 are $47,138 and $46,169, respectively, of private grant and contract receipts, which have not been expended.

Private gifts, grants, and contracts operating revenue for fiscal years 2012 and 2011 consist of the following:

<table>

<td>60,978</td>
<td>—</td>
</tr>
<tr>
<td>Total</td>
<td>$145,012</td>
<td>1,463</td>
</tr>
</tbody>
</table>

(f) **Patient Care**

Patient service revenue is reported net of a provision for doubtful accounts of $13,370 and $12,475 for the University and $45,133 and $45,300 for the Medical Center for the years ended June 30, 2012 and 2011, respectively. This provision reflects the estimated net realizable amounts due from
third-party payors for services rendered. A majority of patient care revenue is derived from contractual agreements with Medicare, Medicaid, Blue Cross/Blue Shield, managed care, and certain other programs. Payments under these agreements and programs are based on specific amounts per case or contracted prices. Certain revenue received from third-party payors is subject to audit and retroactive adjustment. Any changes in estimates under these contracts are recorded in operations currently.

(g)  **Capitalized Interest**

The University capitalizes interest costs incurred on debt during the construction of major projects exceeding one year. During fiscal years 2012 and 2011, the amount of interest capitalized amounted to $11,930 and $12,883 for the University and $10,015 and $7,729 for the Medical Center, respectively.

(h)  **Cash Equivalents**

Cash equivalents include U.S. Treasury notes, commercial paper, and corporate notes with original maturities of three months or less, except that such instruments purchased with endowment assets or funds on deposit with bond trustees are classified as investments.

(i)  **Investments**

Investments are recorded in the consolidated financial statements at estimated fair value. If an investment is held directly by the University and an active market with quoted prices exists, the market price of an identical security is used as reported fair value. Reported fair values for shares in mutual funds are based on share prices reported by the funds as of the last business day of the fiscal year. The University’s interests in alternative investment funds such as private equity, real estate, natural resources, and absolute return are generally reported at the net asset value (NAV) reported by the fund managers, which is used as a practical expedient to estimate the fair value, unless it is probable that all or a portion of the investment will be sold for an amount different from NAV. As of June 30, 2012 and 2011, the University had no plans to sell investments at amounts different from NAV.

The University does not engage directly in unhedged speculative investments; however, the Board of Trustees has authorized derivative investments to adjust market exposure within asset class ranges.
The following table sets forth the gross and net notional values and the University’s gain (loss) related to internally managed derivative activities as of June 30, 2012 and 2011 and for the fiscal years then ended:

To minimize the risk of loss, externally managed absolute return investments are diversified by strategy, external manager, and number of positions. In addition, the activities of external hedge fund managers are reviewed by their independent auditors and the University Investment Office. The risk of any derivative exposure associated with an externally managed hedge fund is limited to the amount invested with each manager. Investment managers report derivative investments at fair value and valuation gains and losses are included in investment gains in the consolidated statements of activities.

(j) **Land, Buildings, Equipment, and Books**

Land, buildings, equipment, and books are generally stated at cost, less accumulated depreciation. Depreciation is computed on the straight-line method over the estimated useful lives of the assets, ranging from 20 to 45 years for buildings and building improvements, 3 to 10 years for equipment, and 10 years for library books.

(k) **Asset Retirement Obligation**

Asset retirement obligations arise primarily from regulations that specify how to dispose of asbestos if facilities are demolished or undergo major renovations or repairs. The obligation to remove asbestos was estimated using site-specific surveys where available and a per-square-foot estimate where surveys were unavailable.
(l) **Split-Interest Agreements**

The University’s split-interest agreements with donors consist primarily of irrevocable charitable remainder trusts for which the University serves as trustee. Assets held in these trusts are included in investments. Contribution revenue is recognized at the dates the trusts are established after recording liabilities for the present value of the estimated future payments to be made to the donors and/or other beneficiaries. The liabilities are adjusted during the term of the trusts for changes in the value of the assets, accretion of the discount, and other changes in the estimates of future benefits.

At June 30, 2012 and 2011, the University had a liability of $48,366 and $49,992 associated with its charitable remainder trust and gift annuities and deferred revenue of $5,151 and $5,638 associated with its pooled income agreements, respectively.

(m) **Income Taxes**

The University is a tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code and, except to the extent the University has unrelated business income, is exempt from federal income taxes. There was no provision for income taxes due on unrelated business income in fiscal years 2012 and 2011. The University has no uncertain tax positions, which the University considers to be material.

(n) **Use of Estimates**

The preparation of the consolidated financial statements in accordance with generally accepted accounting principles requires that management make a number of estimates and assumptions related to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities at the balance sheet date, and the reporting of revenue, expenses, gains, and losses during the period. Actual results may differ from those estimates.

(o) **Subsequent Events**

The University has performed an evaluation of subsequent events through October 10, 2012, which is the date the consolidated financial statements were issued.

(2) **The University of Chicago Medical Center**

(a) **Organization**

The Medical Center, an Illinois not-for-profit corporation, operates the Bernard Mitchell Hospital, the Chicago Lying-In Hospital, the University of Chicago Comer Children’s Hospital, the Duchossois Center for Advanced Medicine, and various other outpatient clinics and treatment areas. The University, as the sole corporate member of the Medical Center, elects the Medical Center’s Board of Trustees and approves its bylaws.

(b) **Agreements with the University**

The relationship between the University and the Medical Center is defined in an Affiliation Agreement and an Operating Agreement along with an associated Lease Agreement. The Affiliation
Agreement specifies University and Medical Center responsibilities for the provision of patient care, teaching, and research at the hospitals and clinics. The Operating Agreement provides for the management and operation by the Medical Center of the University’s hospital and clinic facilities. The Lease Agreement provides the Medical Center a leasehold interest in certain University facilities and land.

(c) Community Benefits

The Medical Center’s policy is to treat patients in immediate need of medical services without regard to their ability to pay for such services, including patients transferred from other hospitals and patients accepted through the Perinatal and Pediatrics Trauma Networks. Patients are offered discounts of up to 100% of charges on a sliding scale based both on income as a percentage of the Federal Poverty Level guidelines and the charges for services rendered. The Medical Center policy also contains provisions that are responsive to those patients subject to catastrophic healthcare expenses. Since the Medical Center does not pursue collection of these amounts, they are not reported as net patient care revenue. The unreimbursed cost of providing such care, along with the unreimbursed cost of government sponsored indigent healthcare programs, unreimbursed cost to support education, clinical research, and other community programs amounted to $252,000 and $204,000 for the years ended June 30, 2012 and 2011, respectively.

(d) Basis of Presentation

The Medical Center maintains its accounts and prepares stand-alone financial statements in conformity with accounting and reporting principles of the AICPA Audit and Accounting Guide for Health Care Organizations. For purposes of presentation of the Medical Center financial position and changes in net assets in the consolidated financial statements, several reclassifications have been made as follows: (1) investment gains used for operations of $37,722 in fiscal year 2012 and $36,454 in fiscal year 2011 have been recorded as unrestricted operating revenue and (2) transfers to the University of $31,892 in fiscal year 2012 and $23,000 in 2011 have been recorded as a reduction of other income.
(3) Investments

Investments at June 30, 2012 and 2011 comprise the following:

(a) Overall Investment Objective

The overall investment objective of the University is to invest its assets in a prudent manner that will achieve a long-term rate of return sufficient to fund a portion of its annual operating activities and increase investment value after inflation. The University diversifies its investments among various asset classes incorporating multiple strategies and external investment managers. Major investment decisions are authorized by the Board of Trustee’s Investment Committee, which oversees the University’s investment program in accordance with established guidelines.

(b) Investment Strategies

Cash equivalent investments include cash equivalents and fixed income investments, with maturities of less than one year, which are valued based on quoted market prices in active markets. The majority of these investments are held in U.S. money market accounts. Global public equity investments consist of separate accounts, commingled funds with liquidity ranging from daily to
monthly, and limited partnerships. Securities held in separate accounts and daily-traded commingled funds are generally valued based on quoted market prices in active markets. Commingled funds with monthly liquidity are valued based on independently determined NAV. Limited partnership interests in equity-oriented funds are valued based upon NAV provided by external fund managers.

Investments in private debt, private equity, real estate, and natural resources are in the form of limited partnership interests, which typically invest in private securities for which there is not readily determinable market value. In these cases, market value is determined by external managers based on a combination of discounted cash flow analysis, industry comparables, and outside appraisals. Where private equity, real estate, and natural resources managers hold publicly traded securities, these securities are generally valued based on market prices. The value of the limited partnership interests are held at the manager’s reported NAV, unless information becomes available indicating the reported NAV may require adjustment. The methods used by managers to assess the NAV of these external investments vary by asset class. The University monitors the valuation methodologies and practices of managers.

The absolute return portfolio is comprised of investments of limited partnership interests in hedge funds and drawdown private equity style partnerships whose managers have the authority to invest in various asset classes at their discretion, including the ability to invest long and short. The majority of the underlying holdings are marketable securities. The remainder of the underlying holdings is held in marketable securities that trade infrequently or in private investments, which are valued by the manager on the basis of an appraised value, discounted cash flow, industry comparables, or some other method. Most hedge funds that hold illiquid investments designate them in special side pockets, which are subject to special restrictions on redemption.

Fixed income investments consist of directly held actively traded treasuries, separately managed accounts, commingled funds, and bond mutual funds that hold securities, the majority of which have maturities greater than one year. These are valued based on quoted market prices in active markets.

Funds in trust investments consist primarily of project construction funds and externally managed endowments.

The University believes that the reported amount of its investments is a reasonable estimate of fair value as of June 30, 2012 and 2011. Because of the inherent uncertainties of valuation, these estimated fair values may differ significantly from values that would have been used had a ready market existed.

(c) Fair Value of Financial Instruments

Fair value is defined as the price that the University would receive upon selling an investment in an orderly transaction between market participants.

The University uses a framework for measuring fair value that includes a hierarchy that categorizes and prioritizes the sources used to measure and disclose fair value. This hierarchy is broken down into three levels based on inputs that market participants would use in valuing the financial instruments based on market data obtained from sources independent of the University. Inputs refer
broadly to the assumptions that market participants would use in pricing the asset, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset developed based on the best information available. The three-tier hierarchy of inputs is summarized in the three broad levels as follows:

- Level 1 – quoted market prices in active markets for identical investments.
- Level 2 – inputs other than quoted prices for similar investments in active markets, quoted prices for identical or similar investments in markets that are not active, or inputs other than quoted prices that are observable including model-based valuation techniques.
- Level 3 – valuation techniques that use significant inputs that are unobservable because they trade infrequently or not at all.
Following is a summary of the inputs used as of June 30, 2012 in valuing the University’s investments carried at fair value:

During fiscal year 2012, there were no transfers between investment Levels 1 and 2, which are considered material to the consolidated financial statements. Transfers between investment levels primarily take place between Levels 2 and 3 in recognition of changes in observable market data at the end of each reporting period.
A summary of the University’s investment returns for the years ended June 30, 2012 and 2011 is presented as follows:

<table>
<thead>
<tr>

(4) **Endowments**

The University of Chicago endowment consists of approximately 2,900 individual funds established for a variety of purposes. The endowment includes both donor-restricted “true” endowment funds and funds designated by the Board of Trustees to function as endowments commonly referred to as “funds functioning as endowment.” Net assets associated with endowment funds, including funds functioning as endowment, are classified and reported based on the existence or absence of donor-imposed restrictions.

</tbody>
</table>

Included in board-designated “funds functioning as endowment” are $358,406 of net assets that are separately invested by the Medical Center.

(c) **Interpretation of Relevant Law**

The “Uniform Prudent Management of Institutional Funds Act” (UPMIFA) was enacted in the state of Illinois in 2009. Although UPMIFA does not preclude the University from spending below the original gift value of donor-restricted “true” endowment funds, for accounting and reporting purposes, the University and Medical Center classify as permanently restricted net assets the historical value of donor-restricted “true” endowment funds, which includes (a) the original value of gifts donated to the permanent endowment, (b) the original value of subsequent gifts to the permanent endowment, and (c) changes to the permanent endowment made in accordance with the direction of the applicable donor gift instrument. The remaining portion of the donor-restricted “true” endowment fund that is not classified in permanently restricted net assets is classified as temporarily restricted net assets until those amounts are appropriated for expenditure in a manner consistent with the standard of prudence prescribed by UPMIFA.

(d) **Endowment Payout**

The University utilizes the total return concept in allocating endowment income. In accordance with the University’s return objective, between 4.5% and 5.5% of a 12-quarter moving average of the fair value of endowment investments lagged by one year, is available each year for expenditure in the form of endowment payout. The payout percentage, which is set each year by the Board of Trustees with the objective of a 5.0% average payout over time, was 5.5% for the fiscal years ended June 30, 2012 and 2011. Periodically, the University Board of Trustees will adjust the endowment payout to fund specifically approved strategic initiatives.

If endowment income received is not sufficient to support the total return objective, the balance is provided from capital gains. If income received is in excess of the objective, the balance is reinvested in the endowment.
(e) **Funds with Deficiencies**

From time to time, the fair value of assets associated with individual donor-restricted “true” endowment funds may fall below the level that the donor or UPMIFA requires to be retained as a fund of perpetual duration. Deficiencies of this nature are reported in unrestricted net assets, which, as of June 30, 2012 and 2011, amounted to $4,429 and $4,803 for the University, respectively.

(5) **Notes and Accounts Receivable**

Components of notes and accounts receivable at June 30, 2012 and 2011 are shown as follows:

<table>
<thead>
<tr>
<th>2012</th>
<th>Allowance for doubtful accounts</th>
<th>Net receivable</th>
<th>2011 Net receivable</th>
</tr>
</thead>
<tbody>
<tr>

* Variable rate debt with interest rates that have been fixed through interest rate swap agreements.
(a) **Fiscal 2012 Transactions**

During fiscal year 2012, the University issued $369,570 in fixed rate revenue bonds through the IFA (Series 2012A) and $190,485 in taxable fixed rate bonds (Series 2012B). Proceeds from the Series 2012A and 2012B bonds were used to 1) advance refund all or a portion of the IHFA Series 1985A, IEFA Series 2003A, and IFA Series 2004A fixed rate bonds and 2) finance the construction and renovation of certain educational facilities.

During fiscal year 2012, the Medical Center issued $75,155 in fixed rate revenue bonds through the IFA (Series 2012A), proceeds from which were used to refund the IHFA Series 2001 fixed rate bonds.

(b) **Defeased Debt**

As of June 30, 2012 and 2011, the total principal amount of indebtedness considered to be legally extinguished and, therefore, excluded from the University notes and bonds payable was $295,855.

(c) **Interest Rate Swaps**

In order to reduce exposure to adjustable interest rates on variable rate debt, the University and Medical Center have entered into debt-related interest rate swap agreements. These agreements have the effect of fixing the rate of interest for the variable rate debt. The fair value of these swap agreements is the estimated amount that the University and Medical Center would have to pay or receive to terminate the agreements as of the consolidated balance sheet date, taking into account current interest rates and the current creditworthiness of the swap counterparty.

At June 30, 2012 and 2011, the fair value of the interest rate swap agreements was an accrued liability of $60,714 and $25,864, for the University and $135,872 and $58,064 for the Medical Center, respectively. Changes in the fair value of the interest rate swap agreements for the fiscal years ended June 30, 2012 and 2011, which amounted to $(34,850) and $(7,257 for the University, and $(77,808) and $3,789 for the Medical Center, respectively, are included in other unrestricted nonoperating changes in the accompanying consolidated statements of activities. These financial instruments involve counterparty credit exposure. The counterparties for these swap transactions are major financial institutions that meet the University’s criteria for financial stability and creditworthiness.

(d) **Debt Payments**

Principal payments required for University notes and bonds in each of the five years ending June 30, 2013 through 2017 are approximately $16,158; $44,449; $33,824; $26,011; and $39,218, respectively.

Principal payments required in each of the five years ending June 30, 2013 through 2017 for the Medical Center notes and bonds are approximately $11,290; $10,385; $10,050; $11,535; and $11,975, respectively.
(e) **Fair Value**

The carrying value of long-term debt does not differ materially from its estimated fair value as of June 30, 2012 and 2011, based on quoted market prices for the same or similar issues.

(f) **Collateral**

Each of the Medical Center bond series is collateralized by unrestricted receivables and subject to certain restrictions. In addition, the Medical Center variable rate bonds are guaranteed by bank letters of credit.

(g) **Remarketing**

Included in the University and Medical Center’s notes and bonds payable are $563,285 and $408,277, respectively, of variable rate notes and bonds maturing through fiscal year 2045. In the event the University and Medical Center’s remarketing agents are unable to remarket the notes and bonds, they become demand obligations and require immediate payment. To supplement internal liquidity, the University and Medical Center have standby bond purchase agreements totaling $300,000 and $408,277, respectively, which support variable rate debt in the event of a failed remarketing.

In addition, the University has a standby bond purchase agreement of $114,502 in support of its IFA Series 2008 variable rate bonds, which, through an interest rate swap agreement, carry a synthetically fixed interest rate.

(8) **Pledges**

Pledges receivable at June 30, 2012 and 2011 are shown as follows:

<table>
<thead>
<tr>
<th></th>
<th>2012 University</th>
<th>2012 Medical Center</th>
<th>2011 Consolidated</th>

<tr>
<td>Total</td>
<td>$ 361,128</td>
<td>10,433</td>
<td>371,561</td>
<td>368,642</td>
</tr>
</tbody>
</table>
The University’s five largest pledges comprise 96% of pledges expected to be collected in more than five years. Included in this amount is the estimated fair value of a nonmarketable equity investment (based on discounted cash flow and market multiples) specifically aligned with a promise to give, the proceeds of which, when sold, will be used to satisfy the pledge.

In addition, at June 30, 2012, the University has received $293,429 of promises to give, which are conditional upon the raising of matching gifts from other sources, implementation of academic programs, completion of construction projects, or future income from pledged investments. These amounts will be recognized as revenue in the periods in which the conditions are fulfilled.

(9) Self-Insurance Liability

The University maintains a self-insurance program for medical malpractice liability. This program is supplemented with commercial excess insurance above the University’s self-insurance retention, which, for the years ended June 30, 2012 and 2011, was $7,500 per claim and unlimited in the aggregate. Claims in excess of $7,500 are subject to an additional self-insurance retention limited to $12,500 per claim and $12,500 in annual aggregate. The Medical Center is included under this insurance program and is charged for its portion of self-insurance costs. The University and Medical Center also maintain a self-insurance program for workers’ compensation and certain other liability claims.

Under the medical malpractice self-insurance program, the University and Medical Center make annual contributions to a related trust fund at an actuarially determined rate that is intended to provide adequate funding of the self-insurance liability over a period of years. Actual settlements of medical malpractice claims may be more or less than the liability estimated by the University.

The medical malpractice self-insurance liability is the estimated present value of self-insured claims that will be settled in the future, and considers anticipated payout patterns as well as interest to be earned on available assets prior to payment. If the present value method was not used, the liability for medical malpractice self-insurance claims would be approximately $40,000 higher than the amount recorded in the consolidated financial statements at June 30, 2012. The interest rate assumed in determining the present value was 3.75%. The University recorded unrestricted nonoperating actuarial income adjustments of $14,973 and $58,013 during the years ended June 30, 2012 and 2011, respectively, which are included in the accompanying consolidated statements of activities.

The estimated liability for incurred malpractice, workers’ compensation, and other claims (filed and unfiled) as of June 30, 2012 and 2011 is presented as follows:

<table>
<thead>
<tr>

(10)  Pension Plans and Other Postretirement Benefits

Substantially all personnel of the University participate in either the defined contribution pension plan for academic staff or the defined benefit and contribution pension plans for nonacademic personnel. The majority of Medical Center employees participate in the University’s pension plans for nonacademic employees. The University and Medical Center make annual contributions to the defined benefit pension plans at a rate necessary to maintain plan funding on an actuarially recommended basis. Based primarily on participation, the University and Medical Center share equally in contributions made to the defined benefit pension plans. In fiscal year 2009, the University’s 403(b) defined benefit pension plan was frozen and a new 401(a) plan was initiated to be in compliance with revised Internal Revenue Service regulations. Because this change does not impact participant benefits, information pertaining to these plans has been combined for financial reporting and disclosure purposes.

In addition to providing pension benefits, the University provides certain healthcare benefits for retired employees and a retirement incentive bonus for eligible faculty electing to participate in a retirement incentive program. In addition to a retirement bonus, all Medicare eligible-tenured faculty who elect to participate in the retirement incentive program receive supplemental health insurance at no cost for themselves and their spouses. All other academic and nonacademic employees are entitled to supplemental health insurance coverage subject to deductibles, copayment provisions, and other limitations.
The funded status and amounts recognized in the consolidated financial statements for the defined benefit pension plans and other postretirement benefit plans are shown as follows:

<table>

</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>$49,600</strong></td>
<td><strong>46,897</strong></td>
</tr>
</tbody>
</table>

(b) Actuarial Assumptions

The weighted average assumptions used in the accounting for the pension and other postretirement benefit plans are shown as follows:

<table>
<thead>
<tr>
<th></th>
<th>Defined benefit pension plans</th>
<th>Other postretirement benefit plans</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2012</td>
<td>2011</td>
</tr>
<tr>
<td>Discount rate</td>
<td>4.5%</td>
<td>5.5%</td>
</tr>
<tr>
<td>Expected return on plan assets</td>
<td>7.1</td>
<td>7.1</td>
</tr>
<tr>
<td>Rate of compensation increase</td>
<td>3.5</td>
<td>3.5</td>
</tr>
<tr>
<td>Healthcare cost trend rates:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Next two fiscal years</td>
<td>7.5% – 7.7%</td>
<td>7.7% – 8.0%</td>
</tr>
<tr>
<td>Next seven fiscal years</td>
<td>6.0% – 7.2%</td>
<td>6.2% – 7.5%</td>
</tr>
<tr>
<td>Thereafter</td>
<td>4.5% – 5.7%</td>
<td>4.5% – 6.0%</td>
</tr>
</tbody>
</table>

The expected return on plan assets assumptions for both the defined benefit pension plan and the other postretirement benefit plans is determined based on models that incorporate a number of different methodologies, including historical returns and capital market forecasts.
Assumed healthcare cost trend rates have a significant effect on the amounts reported for healthcare plans. A one-percentage-point change in assumed healthcare cost trend rates would have the following effects for the fiscal years ended June 30:

<table>
<thead>
<tr>
<th>Effect on total service cost and interest cost:</th>
<th>2012</th>
<th>2011</th>
</tr>
</thead>
<tbody>
<tr>
<td>One-percentage-point increase</td>
<td>$3,904</td>
<td>3,569</td>
</tr>
<tr>
<td>One-percentage-point decrease</td>
<td>(3,017)</td>
<td>(2,752)</td>
</tr>
</tbody>
</table>

<table>
<thead>

<td>27%</td>
<td>27%</td>
</tr>
<tr>
<td>International public equities</td>
<td>14%</td>
<td>16%</td>
</tr>
<tr>
<td>Fixed income</td>
<td>59%</td>
<td>57%</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>100%</td>
<td>100%</td>
</tr>
</tbody>
</table>

As of June 30, 2012, 90% of plan assets for the defined benefit pension plans are invested in cash, mutual funds, exchange traded funds, or separately managed accounts comprised of individual securities and are valued based on quoted market prices in active markets for identical investments (Level 1). The remaining assets are invested in commingled funds and limited partnerships generally valued based on quoted market prices in active markets valued based, NAV reported by external fund managers, or independently determined by the University. The remaining 10% of the plan assets are categorized as Level 2 or Level 3.

The defined benefit plans combined target asset allocation of 43% public equities and 57% fixed income securities is meant to result in a favorable long-term rate of return from a diversified portfolio of equity and fixed income investments. Plan assets for the other postretirement benefit plans are managed by the University and were held in cash at June 30, 2012.

(d) **Contributions**

The University expects to make a $5,000 contribution to its postretirement healthcare plan and, combined with the Medical Center, expects to make a $65,000 contribution to the defined benefit pension plans in fiscal year 2013.
(e) **Estimated Future Benefits Payments**

The following benefit payments, which reflect expected future service, are expected to be paid for each of the fiscal years ending June 30:

<table>
<thead>
<tr>
<th>Fiscal year</th>
<th>Defined benefit plans</th>
<th>Other postretirement benefit plans</th>
</tr>
</thead>
<tbody>
<tr>

<td>10,558</td>
</tr>
<tr>
<td>2018 – 2021</td>
<td>235,874</td>
<td>65,568</td>
</tr>
</tbody>
</table>

(f) **Prescription Drug Act**

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) provides for special tax-free subsidies to employers that offer retiree medical benefit plans with qualifying drug coverage. The University’s postretirement plan currently meets Medicare’s criteria for the tax-free subsidy because the University’s plan provides for a higher level of reimbursement than Medicare. The University has recognized the effect of this subsidy in the calculation of its postretirement benefit obligation, the impact of which is to reduce the benefit obligation by $60,640 and $52,280 at June 30, 2012 and 2011, respectively.

(g) **Curtailed Pension Plan**

The Medical Center maintains a separate noncontributory defined benefit pension plan on behalf of a former affiliated organization. Prior to assumption, the benefit plan was curtailed by freezing participation and benefit accruals. At June 30, 2012 and 2011, the benefit obligation for the plan exceeded the plan’s assets thus creating an unfunded liability of $10,403 and $13,502 at June 30, 2012 and 2011, respectively.

(h) **Defined Contribution Pension Plan**

Defined contribution pension plan expenses included in the consolidated statements of activities amounted to $44,477 in fiscal year 2012 and $42,895 in fiscal year 2011 for the University and $11,100 in fiscal year 2012 and $10,200 in fiscal year 2011 for the Medical Center.
(11) **Functional Classification of Expenses**

Expenses by functional classification for the years ended June 30, 2012 and 2011 are shown as follows:

The University’s primary program service is instruction and research. Expenses reported as auxiliary enterprises, library, and student services are incurred in support of this primary program activity.
(12) **Affiliated Organizations**

The University has an ongoing relationship with the National Opinion Research Center (NORC), a not-for-profit organization that conducts research in the public interest primarily for various federal agencies. The majority of NORC’s board of trustees are faculty members or officers of the University. Program-related revenue for the years ended December 31, 2011 and 2010 was $146,492 and $148,970, respectively. Net assets at December 31, 2011 and 2010 were $25,157 and $21,477, respectively. Consolidation of this not-for-profit organization is not required because the University does not have both control and an economic interest.

The University, through its affiliate UChicago Argonne, LLC, operates Argonne National Laboratory (ANL) under a contract with the U.S. Department of Energy (DOE). This contract provides for the payment of a fixed management allowance and an additional fee based on performance judged against established measures. The University is the sole member of UChicago Argonne, LLC; however, the performance fee is shared with a subcontractor that assists UChicago Argonne, LLC with the management and operation of ANL.

The University, as a member of Fermi Research Alliance, LLC (FRA), also operates Fermi National Accelerator Laboratory (Fermilab) on behalf of DOE. The Fermilab contract between DOE and FRA provides for the payment of a fixed management allowance and an additional performance fee. The University shares the performance fee with Universities Research Association, the other member of FRA, and with a subcontractor that assists FRA with the management and operation of Fermilab.

The expenditures under the respective contracts and the related reimbursements of $756,019 for ANL and $433,691 for Fermilab in fiscal year 2012, and $745,189 for ANL and $431,610 for Fermilab in fiscal year 2011 are not included in the consolidated statements of activities. Net assets relating to ANL and to Fermilab are owned by the U.S. government and, therefore, are not included in the consolidated balance sheets.

(13) **Contingencies**

Various lawsuits, claims, and other contingent liabilities arise in the ordinary course of the University’s education, research, and healthcare activities. In the opinion of management, all such matters have been adequately provided for, are without merit, or are of such kind that if disposed of unfavorably, would not have a material adverse effect on the consolidated financial position of the University.

#### Liabilities and Net Assets

**Liabilities:**

- Accounts payable and accrued expenses $286,382
- Deferred revenue 74,900
- Assets held in custody for others 61,329
- Self-insurance liability 9,332
- Pension and other postretirement benefit obligations 558,231
- Asset retirement obligation 56,256
- Notes and bonds payable 2,439,521
- Refundable U.S. government student loan funds 37,818

**Total liabilities** $3,523,769

**Net assets:**

- Unrestricted 668,196
- Temporarily restricted 2,528,352
- Permanently restricted 1,131,086

**Total net assets** $7,851,403

The Biological Sciences Division (BSD) consists of the Pritzker School of Medicine, twenty-one clinical and basic science Departments, and thirteen interdisciplinary Committees that provide education, research, and patient care.
